ABOUT ME

I'm a B.Sc. Computer Science student who loves building things for the web. I mainly work with the MERN stack – React.js, Node.js, Express.js, and MongoDB – and enjoy turning ideas into full-stack apps, from designing the UI to connecting it with a working backend and database. I've built REST APIs, worked with Git and GitHub, and picked up good habits around clean code and teamwork during my internship. I'm always up for learning new tools and I'm looking for a Full Stack / MERN Developer role where I can keep growing and build products people actually enjoy using

EDUCATION

Bachelor of Science (Computer Science)

PGPCollegeofArtsandScience | 2022–2025

CGPA: 7.1

Higher Secondary School (HSC)

CrescentMatricHigherSecondary School | 2021 – 2022

Percentage: 52%

Secondary School (SSLC)

OxfordMatriculationSchool | 2019 – 2020

Percentage: 57%

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, React.js, Bootstrap.
- **Backend:** Node.js, Express.js.
- **Database:** MongoDB, Mongoose.
- **Version Control:** Git, GitHub.
- **Tools:** VS Code, npm.

CERTIFICATIONS & INTERNSHIP

MERN Full Stack Development Training | Qtree Technologies

(NASSCOM Affiliated)

- Completed professional MERN Stack Development training, gaining hands-on expertise in MongoDB, Express.js, React.js, and Node.js.
- Developed full-stack web applications through practical projects, implementing responsive frontend interfaces, RESTful APIs, and database operations.
- Strengthened skills in frontend-backend integration, database design, API development, Git/GitHub, and real-world software development workflows

MERN Stack Developer Intern | Cubiksoft Technologies Pvt. Ltd., Coimbatore

Sep 2025 – Feb 2026

- Developed a Web Application using the MERN stack, integrating RESTful APIs for seamless frontend-backend communication.
- Collaborated with senior developers on debugging, code reviews, and structured development workflows in a team environment.
- Gained hands-on experience in API integration, Git/GitHub version control, and production-level software development practices

PROJECTS

Online Food Ordering System (MERN Stack)

🔗 Live Website: [Foodies web site link](#)

📺 Demo Video: [Foodies Demo Video](#)

- Developed a full-stack food ordering web application using the MERN stack with user authentication and cart management
- Integrated RESTful APIs and Stripe payment gateway for secure order processing
- Built real-time order tracking features using React Context API and Axios for seamless frontend-backend communication

Vibeify – Dynamic Audio Player (MERN Stack)

🔗 Live Website: [Vibeify – Dynamic Audio Player web site](#)

📺 Demo Video: [Vibeify-demo-video](#)

- Developed Vibeify, a responsive music player web app using React.js and JavaScript, delivering a smooth, real-time listening experience.
- Implemented core audio features – playback, seek, volume control, and dynamic playlist/queue management – using component-based state management.
- Designed a clean, mobile-friendly UI with intuitive controls and deployed the application on Vercel for public access.

SOFT SKILLS

- Teamwork & Collaboration.
- Problem-Solving.
- Time Management

LANGUAGES

- ENGLISH
- TAMIL
